We want to make sure every young person and all teaching staff have a smooth transition to the new secondary model.

In 2019, Gilmore College for Girls will not have a Year 7 intake. Year 7 students will enrol at Footscray City College instead. In addition, next year’s Gilmore College Year 11s will start and complete their VCE at Footscray City College. From 2020, Year 7 students will attend a junior campus within the precinct.

The transition to the new secondary model will be complete and fully operational from the beginning of 2022, with the executive principal appointed at the start of 2019.

### How are we helping Gilmore College for Girls students transition?

A transition coordinator has been appointed and is working with Gilmore College for Girls students and their parents/carers to ensure a seamless transition. Together, they are developing individual transition plans that directly meet the needs of each student. This includes developing options for students who wish to continue in a girls-only stream.

By term 4 2018, all Gilmore students will have a transition plan in place.

### How are we supporting families who wanted their daughter to attend Year 7 at Gilmore College for Girls?

From 2019, Gilmore College for Girls will no longer take Year 7 students. If families have submitted an application through their daughter’s primary school to start Year 7 at Gilmore College in 2019, they will need to contact the transition coordinator at their primary school and ask to complete a new application form. Families are encouraged to talk through their choices with the transition coordinator to explore other options available in your area and explore other schools that offer a girls-only stream.
