Orbost Regeneration Project – Orbost Community College

Design factsheet

In the 2021–2022 State Budget the Victorian Government invested \$7.271 million in the Orbost Regeneration Project, to merge 2 local primary and one secondary school into a new P–12 college. In 2022 the project was allocated a further \$1.198 million to support the upgrade.

The merger of the 3 schools aims to provide all students with greater opportunities in first-rate facilities, located on the current site of Orbost Secondary College. Orbost Community College will open as the new P–12 college in 2024.

Construction began in mid-2022 on the first stage of the project. This stage of delivering a new Food Technology Building and relocation of the canteen to a refurbished space in the school hall is nearing completion.

A builder has recently been appointed for the next stage which includes demolishing an existing teaching building, constructing the new junior building, extending the administration building and landscaping. Delivery of this phase is expected to be complete in 2024.

Site and features

New learning spaces for students of every ability with:

- a new modern food technology building
- new multi-purpose classrooms in junior learning hub
- expanded contemporary staff room facilities
- new basketball court and outdoor stage area.

Upgrade and modernisation - indicative site plan

Orbost Regeneration Project

The Orbost Regeneration is the result of years of collaboration between the 3 school communities. The key areas of focus include:

- developing an educational facility that provides for all students and families in the community
- improving the quality and consistency of teaching and wellbeing practices to boost ability to attract and retain staff
- improving the schools' ability to provide a guaranteed and viable curriculum across a broader range of subject areas.

There will be closer connections between students and staff, and better transition and wellbeing support as students move from primary to secondary learning.
